

Name:

1] Describe three things you learned this week about the GPIO pins on the Raspberry Pi that you didn't know before. (Be specific.)

2] Describe three things you learned this week about coding electronics through GPIO pins using Scratch and Python that you didn't know before. (Be specific.)

3] Describe what you accomplished using GPIO pins and electronic components this week.

4] What did you like most about the class or content this week?

5] What question(s) do you have that still need to be answered? If none, explain how you could extend what you worked on this week even further to make it more interesting, efficient, powerful, useful, or engaging?

Optional] What suggestions do you have to improve the class moving forward?
